WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

A flat frame the shape of the shell rim: outside 64 x 52 with 4 mm corners, inside 60 x 48 with 2 mm corners, 2 mm wide.
Print 1.2 mm thick (six 0.2 mm layers) flat on the bed, slowly.
The three shell screws squeeze it to about 1 mm.
Fit: lay it on the front shell rim before the rear shell goes on;
its inside edge lines up with the inside of the walls.
Check: it lies flat on the rim with no twist or gap.
