WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut a 16 x 11 mm square of mesh with fine snips.
Flatten it between two steel blocks; file off any loose wire ends.
Fit: lay it on the inner floor, centred over the inlet slot (the left slot seen from the front); the inlet seal sits on it and holds it down. Nothing else fixes it.
Check: it covers the whole slot with 2 mm to spare all round.
