WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Print rear face down; no supports needed.

64 x 52 x 14 mm, walls 2 mm, outside edges round 4 mm.

Three tubes 4.5 dia, from the rear wall to 15.2 from the rear face, at the same places as the front bosses (seen from the front: 27 left and 27 right 21 up, 27 right 21 down); hole 2.4 through. Counterbore each from the rear face 4.2 dia, 1.4 deep (screw heads).

Two clip bosses 5 dia, 5.5 long inside, 6 each side of centre, 21 up; pilot hole 1.7 mm, 7 deep from the rear face.

Four cell ribs 1.2 thick, 4 tall, 0.2 off the cell: two at the sides (12 long), two at top and bottom (5 long).

Foam pad 40 x 24 x 1, stuck inside the back wall, centred.

The rim is 14 from the rear face; the gasket sits on it.

Check: the cell drops between the ribs and lifts out freely.
