WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

A bought stainless spring clip with a strap loop, about 22 wide and 40 long, base leaf about 1 mm thick.

If its base leaf has no holes, drill two 2.2 mm holes 12 apart across the leaf, 3 mm from its top end; open the clip and clamp the leaf on wood to drill; deburr.

Fit: base leaf flat on the rear face, centred, top end 2 mm below the badge's top edge; two M2 x 8 screws into the bosses.

Check: the screw heads sit flat and the clip still closes.
